

**Raigmore Hospital, Inverness
Clinical Physiology
Clinical Support Division**

**Cardiac Clinical Physiologist/Lead
Specialist - Echocardiography**

**Band 7
37.5 hours, Permanent
Salary Scale: £32,974 - £43,471**

NHS Highland Cardiology Department provides specialist cardiac services including Cardiac catheterisation, PCI, pacemaker and ICD implantation, as well as a full range of cardiac diagnostic tests.

We are looking to recruit a Cardiac Physiologist to be part of the echocardiography team, working in the hospital's new echo suite using full digital archiving facilities. Services include adult and paediatric echo, TOEs, contrast and 3D studies. Your contribution to the service will be tailored to your experience and interests and could include highly specialist areas such as Contrast Echo, Sonographer led outpatient clinics, training, paediatric echo or one-stop services. You will also be required to carry out other cardiac diagnostics performed within the Clinical Physiology service to maintain or develop your cardiac physiology knowledge.

You should hold a BSc in Clinical Physiology (cardiology); although an equivalent qualification along with suitable knowledge, training and experience may be acceptable. You should hold BSE accreditation, although newly qualified / inexperienced echocardiographers are also encouraged to apply as in-house training could be provided to develop a suitable candidate into the post.

For an informal discussion please contact Dr Colin Farman on 01463 706003.

Application Forms and Job Descriptions can be downloaded via our website www.nhshighland.scot.nhs.uk, alternatively they are available from the Employment Services Section, Assynt House, Beechwood Business Park, Inverness, IV2 3BW, Tel 01463 705527 or by emailing your name and address to nhshighland.recruitment@nhs.net

**Shortlisted applicants will normally be contacted by email unless otherwise stated.
Please check your emails regularly, including your junk / spam folder.**
