

The Cardiology Department is looking for high calibre, motivated and enthusiastic individuals to join our team of Cardiac Physiologists. Services are offered across three hospital sites, in West London as well as in the community. The hospitals are Hammersmith, Charing Cross and St Mary's.

Successful applicants will be based mainly at one site but would be expected to provide cover across all sites, as well as the community.

Imperial's Cardiology Department provides a diverse patient workload, including 3 busy A&E departments and 6 cardiac catheter labs. Our position as a tertiary centre for Interventional Cardiology (including a 24/7 primary PCI service), Electrophysiology and complex CRM devices ensures that you will experience varied and interesting patient cases.

We offer the chance to work in one of the UK's first Academic Health Science Centre's (AHSC) and offer excellent training and development opportunities to all staff. There are also opportunities to specialise in areas of interest as well as involvement in research within the department.

We have the following vacancies:

**Managerial Principal Echocardiographer
Community Post – Ref. 290-CSR-H-80
Band 8a – £45,068 – £52,838 inc.**

As an expert practitioner in the field of Echocardiography the post-holder is able to perform a full range of highly specialised clinical-technical echocardiographic procedures to a highly competent advanced professional standard, and provide expert opinion and advice related to this specialist Cardiac Physiology field. This post will lead and manage the Echocardiography service in the community and St Mary's Site.

**Principal Echocardiographer for Quality Control
Community Post – Ref. 290-CSR-H-81
Band 8a – £45,068 – £52,838 inc.**

As an expert practitioner in the field of Echocardiography the post holder will provide non-invasive cardiac physiology services. The specific focus of this role is to run quality assurance of the cardiac investigation services. The aim is for there to be tight intra- and inter-observer reproducibility for physiologists and doctors participating in cardiac investigation services, particularly echocardiography. The scope of the role extends from the community service to clinical and research investigations.

Looking for a new challenge?

**Chief Cardiac Physiologist – Ref. 290-CSR-H-82
Band 7 – £36,552 – £46,374 inc.**

Cardiac Rhythm Management

Competent in Electrophysiology procedures (including complex mapping) or advanced technical skills in Implantable Devices. Ideally, you would be IBHRE/HRUK accredited.

Echocardiography

Qualified to at least BSc Clinical Physiology level or equivalent with advanced technical skills in Echo procedures. BSE accreditation is desirable.

Cardiology – Rotational

Qualified to at least BSc Clinical Physiology level or equivalent and experienced in both invasive and non invasive procedures. Applicants must demonstrate advanced technical skills and further qualifications in at least one discipline within Cardiology (excluding echo).

**Senior Cardiac Physiologist – Ref. 290-CSR-H-83
Band 6 – £30,566 – £40,406 inc.**

Cardiology – Rotational

You will possess a BSc Clinical Physiology or equivalent with experience in a wide range of cardiac investigations. Training in more specialised techniques will be provided.

Echocardiography

Band 6 applicants should have obtained a BSc Clinical Physiology. You should be competent in the full range of cardiac investigations with a specific interest in Echocardiographic procedures.
